

## **WHAT IS AB341?**

AB341 sets a state wide waste diversion goal of 75% by the year 2020.

Beginning July 1, 2012, AB 341 requires mandatory commercial recycling by certain businesses and public entities that generate four or more cubic yards of waste per week, and multi-family housing facilities with five or more units.

## **HOW DO I COMPLY WITH THE LAW?**

A commercial or multi family waste generator meeting the above thresholds shall take at least one of the following actions:

- (1) Separate recyclable materials and subscribe to a basic level of recycling service that includes collection, self-hauling, or other arrangements for the pickup of the recyclable materials.
  
- (2) Subscribe to a recycling service that may include mixed waste processing that yields diversion results comparable to source separation.

CR&R will work with you to provide a waste survey and recommend an appropriate amount of recycling service. In most cases, your waste bill may be reduced by implementing a recycling program. We will provide training and educational material for your employees or tenants.
